

**January 2011**

Welcome back everyone! Hope you all had a wonderful holiday season. Our New Year's resolution for 2011 is to continue to offer world class products and services to all of our customers and we intend to keep you informed of our commitment through this newsletter. We were very proud to announce the opening of Tornatech Europe S.P.R.L in our November newsletter and we are back this month with some more product news. Happy Reading!

**ViZi Touch Update**

Until now all you have seen of the ViZi Touch are graphics of an Electric Fire Pump Controller. For the first time ever, here is our Diesel Fire Pump Controller home page. As you can see, the use of graphics allows the user to easily visualize the state of the engine and controller.

As mentioned in our November newsletter, our sales team are now equipped with ViZi Touch demonstrators. We think that you will be pleasantly surprised and of course all your comments and suggestions are welcome

**Our Alarm Panels Get A Face Lift !**

We have given our alarm panels a well deserved face lift. Gone are the traditional type pilot lights and buzzer and in are high luminosity LEDs and a four inch alarm bell. Add a NEMA 2 enclosure with bottom entry gland plate and you've got the finest alarm panel on the market. In addition to the existing APE and APD alarm panels, we have standardized on three new models:

- Model APEE - Monitors two electric fire pump controllers
- Model APDD - Monitors two diesel fire pump controllers
- Model APED - Monitors one electric fire pump controller and one diesel fire pump controller.

These new alarm panels are now available. Visit our website for brochures and technical drawings.

**Upcoming Trade Shows**

Thank you for visiting us at the ASPE trade show. We hope that they were informative and we look forward to seeing you at the following upcoming trade shows.
