

November 2010

Welcome back everyone! We hope our first newsletter in September was informative. We are back this month with some more ViZi Touch and ground breaking news about Tornatech. Happy Reading !

Tornatech Europe S.P.R.L.

As part of our global strategy of becoming a worldwide reference in Fire Pump Controllers, we are proud to announce the opening of Tornatech Europe S.p.r.l. located in Wavre, Belgium. The objective is to manufacture UL/FM Fire Pump Controllers and fire pump controllers to various European standards such as EN12845, VDS, VAS, and APSAD to name a few. This investment will help us better serve our European customers and continue to provide quality products and service which are synonymous with the Tornatech name. We will keep you informed on official operation dates.

ViZi Touch Update

Visitors at the American Fire Sprinkler Association (AFSA) Convention in Providence Rhode Island last month got a first look at our ViZi Touch demonstrator. Comments and reactions were very positive to say the least. Using the latest technologies available has enabled us to simplify the operation of a fire pump controller while introducing value added features never seen before.

With the help of your comments collected at the recent trade shows, our R&D engineers are continuing the development of the ViZi Touch which is proceeding steadily. The graphics have evolved and the final look is nearly complete. Our best estimates today are that the ViZi Touch will be available to the market Spring 2011.

Our sales team will be equipped with ViZi Touch demonstrators as of December. We hope that you will be pleasantly surprised and of course all your comments and suggestions are welcome.

Upcoming Trade Shows

Thank you for visiting us at the ASPE trade show. We hope that they were informative and we look forward to seeing you at the following upcoming trade shows.

Event	Dates	Location	Our Booth
American Society of Plumbing Engineers (ASPE) Exposition	Nov. 1-2, 2010	Philadelphia, Pennsylvania, USA	241
Intersec	January 16-18, 2011	Dubai, U.A.E.	8-118F
Mexico Fire Expo	April 12-14, 2011	Mexico City, Mexico	3545
NFPA	June 12-14, 2011	Boston, USA	870

Come visit us and ask for a demonstration of our ViZi Touch...TOUCH THE INNOVATION!

Product update

All full service electric Fire Pump Controllers built after October 1, 2010 are equipped with our newly redesigned emergency start handle. Traditionally the emergency start handle has been problematic due to the fact that activation was troublesome and because the limit switch would often get damaged by the incoming power cables coming up from the bottom of the enclosure. Our new design now includes a bigger handle for greater activating capability and an enclosed casing for the limit switch positioned on the left side of the run contactor. For more information contact us.

See you in the New Year !
